Team

KwangHyeon KIM | Founder & CEO

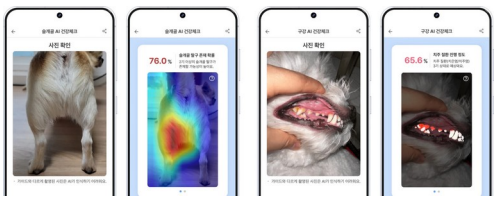

- Ex-New Business Planning, ST Unitas
- Ex-AI Business Division, Testworks
- B.A., Sungkyunkwan University

Juyong PARK, DVM | CTO

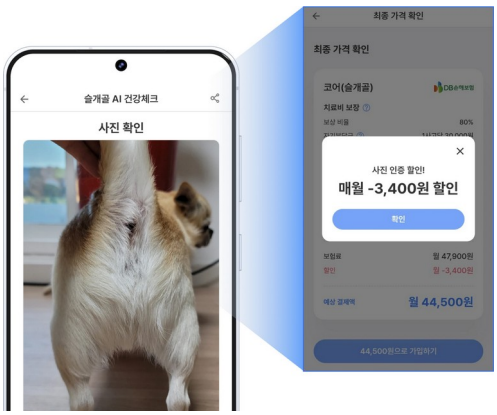

- 9 years in small-animal clinical practice
- Ex-Head of Internal Medicine, referral animal hospital
- DVM, Kyungpook; M.S., Konkuk Univ.

Geonwoo PARK | AI Researcher

- 6 years in vision AI research
- Ph.D. candidate in CS, KAIST
- Ex-AI Researcher, Filer

One photo in, results in 3 seconds (patella, teeth)

Healthy AI result = lower premium at sign-up

17 vet-formulated private-label supplements

Problem

- Pet insurers price risk on age and breed alone; a vet health check at sign-up is too slow and costly
- Progressive diseases such as patellar luxation, the #1 claim cause, go unseen early; rival products in Korea run 120–130% loss ratios

Solution

- Lifet AI grades five progressive diseases from one smartphone photo in 3 seconds, with no device or clinic visit
- Insurers use the results to accept risks and set premiums; pets with healthy results get a discount at sign-up
- Lifet Pet Insurance, co-developed with DB Insurance, runs a 67.8% loss ratio, about half the market average

Key Features

- Korea's only two approved veterinary SaMD products (patellar luxation, periodontal disease), 97%+ accuracy in clinical trials
- 120K+ proprietary training images and 19 patents, incl. 5 US filings
- Plugs into partner apps via API, web link or membership bundle, with fixed or usage-based pricing

Business Model

- **B2B API:** license fees from insurers, electronics makers, telcos, card issuers
- **Insurance:** commissions on Lifet Pet Insurance, underwritten with AI test results
- **Commerce:** post-test supplement curation, incl. 17 vet-formulated PB products

Business Snapshot

- **Revenue:** KRW 1.16B (USD 0.8M) in 2025, and KRW 1.36B (USD 0.9M) in Jan–Sep 2026 alone
- **Investment:** KRW 2.25B (USD 1.55M) raised through Pre-A; Series A in progress; selected for Korea's TIPS
- **Clients:** 8 companies, 12 services incl. Samsung Electronics, LG Electronics, Samsung Fire & Marine, DB Insurance, SKT, KT
- **Global:** Samsung SmartThings Pet Care US launch (Oct 2026); Japan license with ENTREX (MY PET+ app)
- **Traction:** 150K+ AI tests run; exhibited with Samsung at CES 2026 and VivaTech 2026

Seeking Opportunities

- **PoC** with pet insurers and insurance platforms on AI underwriting
- **API partners:** telcos, banks and e-commerce that sell pet insurance
- Meetings with **VCs for Series A** and **SEA regional expansion**
- **Distributors** and **importers** for our vet-formulated supplements
