Team

KANG Jung Seok | Founder & CEO

- Ex-Citigroup, LG CNS; policy role at Korea National Assembly
- Early investor in WiPower (acquired by Qualcomm)
- Chicago Booth MBA; Seoul Nat'l Univ.

CHO Sung Jun | CSO

- Ex-Head of Risk, Volkswagen Financial Services China & Korea
- StanChart, Citi, LG Card; LBS MSc Finance

AIZEN EV ecosystem and regional footprint

Problem

- Gig and delivery drivers across Southeast Asia lack credit history, so EV financing is out of reach or priced punitively.
- Banks cannot price EV residual value, battery health or new brands, so EV fleet lending stays scarce and costly.

Solution

- AIZEN finances and operates EV fleets for Grab/Gojek drivers, underwritten by its own finance-specialized Vertical AI.
- Live vehicle, battery and repayment data drive continuous credit, pricing and residual-value decisions.
- CreditConnect connects platforms, OEMs, banks and insurers on one EV financing rail.

Key Features

- **ABACUS AutoML:** 50+ finance-tuned algorithms; runs thousands of models; used by major Korean banks.
- **EV risk engine:** battery state-of-health and residual-value prediction from GPS and battery telemetry.
- **Real-time decisioning:** sub-90ms fraud/credit scoring, recognized by MAS (FinTech Award, Veritas).

Business Model

- **EV-as-a-Service:** recurring service fees from B2B fleet partners and B2C rent-to-own drivers.
- **Vertical AI:** ABACUS licensing and AI services for banks, card issuers and insurers.
- **Data upside:** carbon credits, embedded insurance and tokenized asset-backed products.

Business Snapshot

- **Scale:** ~20,000 EV 2-wheelers in Indonesia; ~80% B2B share
- **Revenue:** ARR >US$20M (Jul-2026 run-rate), growing ~25% QoQ
- **Funding:** US$38.8M equity raised; JB Financial as investor & lender
- **Footprint:** Active in ID, VN, KH; Thailand next; 2W → 4W & trucks
- **IP:** 100+ AI patents filed; Singapore HQ, Korea R&D

Seeking Opportunities

- Growth-equity and strategic investors for our next round (Singapore HoldCo)
- Credit partners (banks, private credit, ABS funds) to scale the fleet to 100k+ units
- Mobility, OEM and battery partners for Vietnam, Thailand and 4W/truck roll-out
