Oliver AHN | Director of Sales & BD

- Ex-Hyundai Vendys BPO, Mirae Asset Financial Services
- Leads enterprise sales and partnership development

Alex LEE | Global Operations & BD

- PwC Korea, Deals/M&A Advisory
- Leads & manage global expansion

Problem

- Workers create value every day, but wages are paid once a month, creating a cash-flow gap before payday.
- To bridge the gap, employees turn to credit cards and high-interest loans, fueling unnecessary debt and financial stress.
- Companies gain liquidity during the pay cycle while employees bear the opportunity cost and lose financial autonomy.

Solution

- Employees accrue "Canopy Mileage" for every workday verified by geo-sensing check-in and withdraw earned wages to their payroll account.
- Each withdrawal is a true sale of wages already earned, not a loan: zero interest, zero per-use fees, only a flat monthly subscription fee.
- On payday the employer pays full salary as usual; Canopy settles only the advanced amount via pre-registered settlement method. No change to payroll, no employer cost or risk.

Key Features

- No HR/payroll integration required: attendance is verified by proprietary geo-sensing, so a company goes live in one day.
- Korea's only EWA platform running both employer-adopted (B2B2C) and direct-to-consumer (B2C) lines; B2C eligibility is verified via national health-insurance employment and income data.
- Patented EWA technology (2026) with built-in risk control: pre-screened employers, verified income, and legally assigned wage claims.

Business Model

- Flat monthly subscription fee: paid by the employee, the employer, or split, at the employer's choice.
- Points & payments: mileage converts to partner loyalty points (e.g.,LOTTE L.POINT) at a 2% fee.
- Ecosystem revenue: discounted brand gift-card margins (Canopy Coupon), co-branded bank debit card and Canopy benefitmall revenue share, and embedded distribution via HR/payroll SaaS.

Business Snapshot

- 30,000+ users and 50+ enterprise clients (incl. Hanwha, Hansol, Daekyo, Zegna) as of Sep 2026; 83% retention.
- Cumulative advances grew 40x in 1H 2026 to KRW 3.45B (~USD 2.5M); monthly advances up 8x from March to June.
- ~USD 2.3M raised from Hanwha Hotels & Resorts, Seoul National Univ. Holdings, Smilegate, Magellan, CNT Tech; backed by KODIT and TIPS.
- FSC Fintech Innovative Company (2026); Grand Prize, Seoul Fintech Week 2025; ISO 37001/37301
- Japan: entity incorporation confirmed for Q4 2026; officially supported by Shibuya City (UP Program) and JETRO; working with Osaka Prefecture and FinCity.Tokyo; 3 PoCs in discussion incl. a listed company.

Seeking Opportunities

- **PoC partners** in Singapore: banks and payout infrastructure, HR/payroll providers, and loyalty or digital-wallet players to co-validate EWA and points-based wage access.
- **Employers (SMEs to enterprises)** to pilot Canopy as a zero-cost employee financial-wellness benefit,.
- **Investors:** VCs, bank and financial-group CVCs, and fintech funds in Singapore and SEA focused on financial inclusion and embedded finance, for our upcoming round.
