- BS and MS at Yonsei University

Seunga LEE | Head of UI/UX

- Fintech, media and DeFI UX (18+years)
- MFA at School of the Art Institute of Chicago; BFA. at Ewha Womans University

Problem

- Bank records cannot prove a transfer to family was a loan, exposing it to gift tax and disputes
- Paper IOUs need in-person signatures and costly notarisation, so personal loans often remain verbal promises

Solution

- MoneyGuard lets lenders and borrowers sign a mobile IOU in 3 minutes through PASS identity verification, without meeting in person or visiting a notary
- The signed IOU proves a transfer was a loan for tax review or disputes, and a Korean district court has accepted it as evidence

Key Features

- Standard IOU templates where users fill in only the amount, due date and interest
- Repayment date reminders sent to both lender and borrower
- Every IOU stored in the app with each party's signing time on record

Business Model

- Per-document fee: USD 7.49 per IOU in the app, or USD 29.99 with tax advice
- Paid retrieval: Charging for viewing and re-downloading stored IOUs
- Bank partnership: Offering the same IOU flow inside partner banks' transfer screens

Business Snapshot

- Investment: USD 172K, Seed (2024)
- Sales revenue: USD 81K in 2025; USD 76K in Jan-Jul 2026
- Cumulative agreements: USD 397M across 20,000 IOUs, 40% repeat rate (2026)
- Partnership contract with a WOORI bank (2026)
- Selected for Google Play ChanGoo Program (2025) and NICE Group Open Innovation (2026)

Seeking Opportunities

- Networking with potential bank partners in Southeast Asia
- Networking with potential legal-tech partners
- Connecting with investors (targeting Q1-2027 for Pre-A)
